Location Gurgaon, India

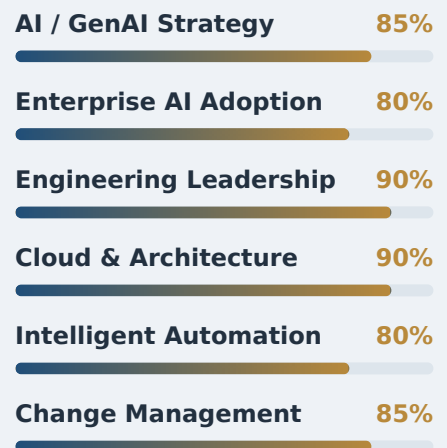

Profile

Technology executive with 14+ years leading enterprise transformation, now focused on driving Generative and Agentic AI adoption across BFSI and enterprise domains. Pairs deep product-engineering leadership — 180+ member orgs, 32 direct reports, ₹12-15 Cr P&L — with hands-on delivery of AI-enabled banking solutions, intelligent categorization, and recommendation engines. Builds AI strategy, adoption roadmaps, governance, and intelligent automation that tie emerging technology to business value.

Work Experience

- Founder** Apr 2025 – Present
Agnisc Corp · India
Founded a consultancy advising enterprises on AI transformation, GenAI implementation, and intelligent-automation strategy — from roadmap to governed, production-grade delivery.
- Associate Director — Product Engineering** Mar 2022 – Mar 2025
Xebia · Gurgaon, India
Delivered AI-enabled banking experiences — AI-powered transaction categorization and intelligent recommendation engines — while leading a 180+ member org with ₹12-15 Cr P&L. Shaped modernization and automation strategy for enterprise clients across BFSI.
- Technical Product Manager** Apr 2020 – Jan 2022
Knowlarity · Gurgaon, India

GGSIU, Delhi

14+ years in technology & engineering leadership

Led 180+ member orgs · 32 direct reports

₹12-15 Cr P&L ownership

Founder, Agnisc Corp

More About Me

I am a seasoned technology and product-engineering leader focused on building impactful products and high-performing organizations that deliver sustainable growth for customers and stakeholders. I have defined strategic visions and delivered innovative solutions for organizations including Xebia, Knowlarity, and Quess Corp, and partnered with clients such as McKinsey & Company and Bain & Company.

I have worked across the full software-development lifecycle — onsite, remote, and everything in between — with small and large organizations spanning Banking, Insurance, Telecom, Media, Security, and more. I stay hands-on with technology (ReactJS, Node.js, Python, Backbase, mobile-native) while leading distributed teams in onshore/offshore models, and I place great emphasis on Agile, TDD/BDD, and delivering quality products frequently and predictably.
