Location Gurgaon, India

Profile

Engineering delivery executive with 14+ years managing distributed teams, enterprise portfolios, and complex transformation programs across BFSI, Telecom, Aviation, and Enterprise SaaS. Led 180+ member organizations with 32 direct reports and ₹12-15 Cr P&L, accountable for delivery excellence, operational governance, customer success, and profitability — well suited to global and remote-first operating models.

Work Experience

- Founder** Apr 2025 – Present
Agnisc Corp · India
Founded a digital-engineering consultancy delivering modernization and transformation programs with outcome-based delivery models.
- Associate Director — Product Engineering** Mar 2022 – Mar 2025
Xebia · Gurgaon, India
Owned an enterprise engineering portfolio with ₹12-15 Cr P&L and a 180+ member, geographically distributed organization (32 direct reports). Established delivery-governance and CoE frameworks driving predictable, high-quality outcomes across concurrent banking programs.
- Technical Product Manager** Apr 2020 – Jan 2022
Knowlarity · Gurgaon, India
Managed end-to-end delivery for a cloud-communications platform — scope, quality, and timelines across cross-functional engineering teams.

CDAC Noida
- B.Tech — Electronics & Communication Engineering** 2007 – 2011
GGSIU, Delhi

More About Me

I am a seasoned technology and product-engineering leader focused on building impactful products and high-performing organizations that deliver sustainable growth for customers and stakeholders. I have defined strategic visions and delivered innovative solutions for

organizations including Xebia, Knowlarity, and Quess Corp, and partnered with clients such as McKinsey & Company and Bain & Company.

I have worked across the full software-development lifecycle — onsite, remote, and everything in between — with small and large organizations spanning Banking, Insurance, Telecom, Media, Security, and more. I stay hands-on with technology (ReactJS, Node.js, Python, Backbase, mobile-native) while leading distributed teams in onshore/offshore models, and I place great emphasis on Agile, TDD/BDD, and delivering quality products frequently and predictably.
