PG Diploma — Mobile Application Development 2011 – 2012
CDAC Noida

B.Tech — Electronics & Communication Engineering 2007 – 2011
GGSIU, Delhi

More About Me

I am a seasoned technology and product-engineering leader focused on building impactful products and high-performing organizations that deliver sustainable growth for customers and stakeholders. I have defined strategic visions and delivered innovative solutions for organizations including Xebia, Knowlarity, and Quess Corp, and partnered with clients such as McKinsey & Company and Bain & Company.

I have worked across the full software-development lifecycle — onsite, remote, and everything in between — with small and large organizations spanning Banking, Insurance, Telecom, Media, Security, and more. I stay hands-on with technology (ReactJS, Node.js, Python, Backbase, mobile-native) while leading distributed teams in onshore/offshore models, and I place great emphasis on Agile, TDD/BDD, and delivering quality products frequently and predictably.
